CAREER OBJECTIVE

Motivated Electronics and Communication Engineering student with strong foundations in programming, problem-solving, and web technologies, along with hands-on experience in IoT and real-time systems. Seeking an entry-level opportunity in software development and technology-driven domains to build scalable solutions and continuously enhance technical expertise.

EDUCATION

KPR Institute of Engineering and Technology

Coimbatore, India

Bachelor of Engineering in Electronics and Communication

2023 - 2027

Honours with Specialization in Internet of Things (IoT)

CGPA : 8.53*

Bharathiyar Hi-Tech International CBSE School

Salem, India

Higher Secondary Certificate (HSC) : 95.2 %

2022 - 2023

SKILLS SUMMARY

Languages : Java, Python, C, JavaScript, SQL

Web Technologies : HTML5, CSS3, Bootstrap

Tools & Software : GitHub, VS Code, Arduino IDE, Matlab, CST Studio Suite, Proteus

Hardware & Platforms : ESP 32, ESP 8266, Raspberry pi, Silicon Labs Development kit (BRD2605A)

Soft Skills : Analytical Thinking, Problem Solving, Leadership, Adaptability, Communication

PROJECTS

Gesture Driven Presentation System (OpenCV)

- Developed a real-time hand gesture recognition system using OpenCV and Python for touchless slide navigation.
- Implemented image processing techniques to ensure accurate gesture detection and smooth control.

Cattle Breed Detection System

- Built a machine learning-based system to identify cattle breeds using image data.
- Applied image processing and classification techniques to improve detection accuracy.
- Designed the system to support agricultural and livestock monitoring applications.

Adaptive Noise Cancellation using LMS Algorithm

- Implemented LMS adaptive filtering algorithm in MATLAB for real-time noise reduction.
- Analyzed convergence behavior and performance using audio signal inputs.

Raspberry Pi GPIO Control & Monitoring via WebIOPi

- Developed a web-based interface for remote GPIO control using Raspberry Pi.
- Enabled real-time monitoring of sensors and actuators through a browser interface.

Line Follower Prototype

- Designed and implemented an autonomous robot using IR sensors and microcontroller.
- Optimized control logic for accurate path tracking and efficient movement.

INTERNSHIP EXPERIENCE

Centre for Smart Antenna Systems and Measurements | KPRIET

January 2025

Coimbatore, India

- Designed and simulated antennas using CST Studio Suite.
- Analyzed radiation patterns, gain, and performance parameters.
- Generated Gerber files for antenna prototypes.

Embedded Systems | CALIBER EMBEDDED

June 2025 - July 2025

Salem, India

- Developed embedded system applications using Arduino.
- Implemented sensor interfacing and real-time testing.
- Worked on hardware-software integration for IoT-based systems.

CERTIFICATIONS

- NPTEL** : Introduction to Industry 4.0 & IIoT (Elite + Silver)
Microsensors and Nanosensors (Elite + Silver)
Blockchain and its Applications (Elite)
- IBM SkillsBuild** - Cloud Computing Fundamentals
- HackerRank** - Python, Problem Solving, SQL

ACCOMPLISHMENTS & ACTIVITIES

- 1st Prize - Paper Presentation (Elexsiya'26) - Anna University Regional Campus, Madurai
- 1st Prize - Mathematics Week Paper Presentation
- Top 1% Performer** - NPTEL Examination - Microsensors and Nanosensors
- 1st Prize - IEEE Day Prompt Craft
- International Conference Participant** - KPRIET (2026)
- Joint Secretary** - IETE Students Forum (2024–2025)
- Executive Member** - Spartranz Association of ECE (2025–2026)
- Cadet Under Officer** - 6 (TN) Medical Company NCC (2025–2026)
